KRE Moodle Student Interface 2026

In this section, we will look at where to find the most important functions on the new interface

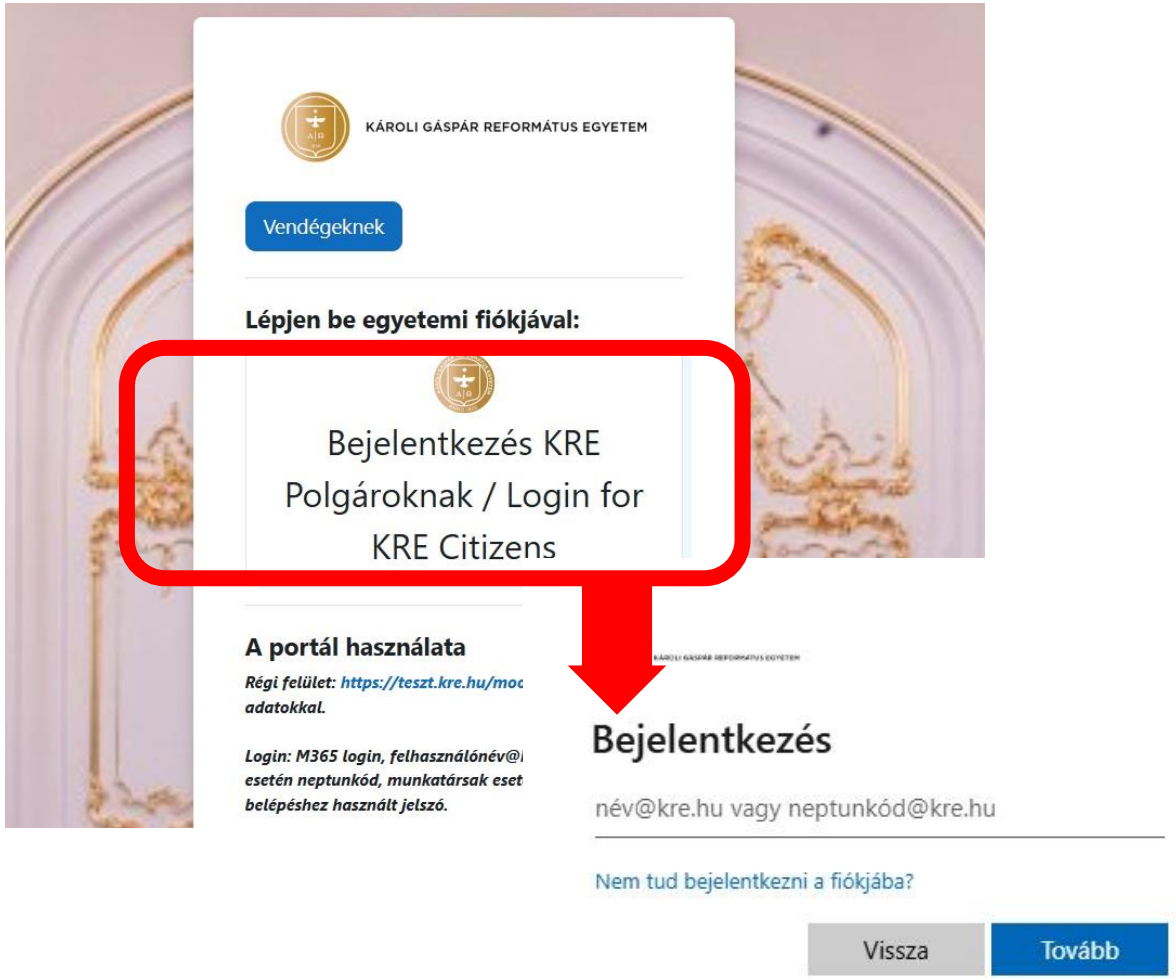
Estimated completion time: approx. 10 minutes

Device and software requirements: web browser

©2026

Logging into the system

- Website: https://moodle.kre.hu/
- Login for **KRE Citizens** (not for guests)
- For students, the username is: **<neptuncode>@kre.hu** and **Neptun password**



Jelszó ugyan az, mint amit a **Neptun** belépésnél is használ.

The password is the same as the one you use to log in to **Neptun**.

Segítségre van szüksége?/Need help? it@kre.hu

Two-factor authentication

- During login, the system may request two-factor authentication. In this case, it verifies the user via email or phone.
- Authentication can also be done by installing and configuring **Microsoft Authenticator** on your phone.
  - **Android:** https://play.google.com/store/apps/details?id=com.azure.authenticator&hl=en_ZA
  - **Apple:** https://apps.apple.com/us/app/microsoft-authenticator/id983156458
- **Google Authenticator does not work for this!**
- After installation, you must create your profile using your **<neptuncode>@kre.hu** and **Neptun password**.
- Once installed, the application will prompt you on your phone to authenticate yourself whenever a login attempt occurs.
- The app is **tied to your device and not your phone number**, and this is important!
  - This means that **if you change phones, you must remove the profile from your old device, set it up on the new device, and verify that the app works.**
  - If you do not do this, verification codes will be sent to your old device, which you no longer have, so **you will not be able to log in**.
  - In case of errors, login issues, or problems arising after changing phones, send an email to it@kre.hu requesting a reset of your settings. Be sure to include your Neptun code and full name in the email.

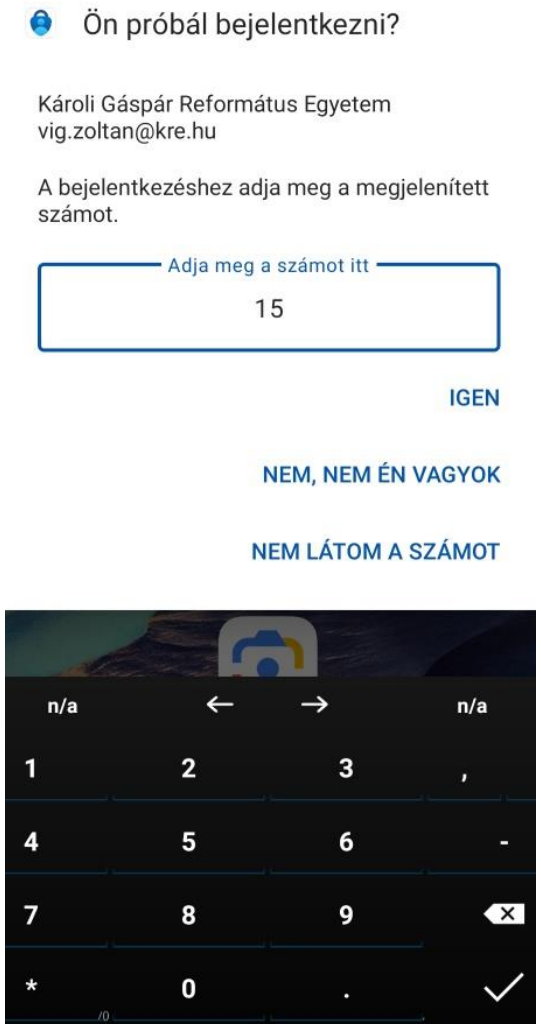
Using Microsoft Authenticator

- After entering your **<neptuncode>@kre.hu** and **Neptun password**, you will see a number on the screen and receive a push notification on your phone about the login attempt.
- On the prompt that appears on your phone, enter this number and verify your identity according to your phone's security settings.



©2026

- After logging in, your profile is located in the top right corner, where you can set your personal details (1)
- You can return to this page using the Home link at the top (2)
- You can find your courses under **Home** and **My courses** (2, 3)

Profile details

- You can always access your profile by clicking on your name in the top right corner of the screen (1)
- Click on your name in the top right (1) and select the Profile menu item (2). Many settings are available here—they are worth exploring, **but a few things are definitely important to set up once.**
- To do this, click on the Edit profile link. Check your email address; if it changes, you can modify it here. (3)
  - When making changes, the system sends a verification email, and the change takes effect once you click the link inside it.
  - **Even if you change your email address, the username used for logging in (<neptuncode>@kre.hu) DOES NOT CHANGE; you must continue to log in with it.**
  - The system sends notifications to the email address provided here**, so enter an email address that you regularly check.**
  - Check whether messages from Moodle arrive in your inbox or end up in your Spam / Junk folder. If so, adjust your email client's spam filtering rules.

Additional profile details

- The information displayed here allows you to stay in touch with other users and instructors, and is used by the system to notify you. **You do not need to fill out everything, but there are a few important items.**
- Uploading a user photo
  - It is recommended to upload one, but avoid using an overly high-resolution or large file. Approx. 500×500 pixels is sufficient.
  - The photo should clearly show your face, preferably from the front.
  - Prepare the image on your computer, resize and crop it, and drag the finished file into the designated box.
- Expanding the Optional section reveals a few recommended settings:
  - You can enter your Skype ID,
  - Or your phone number.
  - The details shown here will be visible to others enrolled in the same courses so they can contact you.
- Click the **Update profile** button at the bottom of the page to save your data.
- Your profile is now ready—let's take a look at courses.

©2026

Courses

- Courses can be accessed from the My courses or Home menu at the top of the page.
- Students are automatically assigned to Moodle courses based on Neptun data. Updates are not instantaneous; the two systems synchronize periodically.
- If you have registered for a course in Neptun but still do not see it on Moodle after a few business days, contact your instructor or the Moodle administrator (moodle@kre.hu).
- In Moodle courses, you will mostly find **downloadable materials**, whose **icons are blue**.
- **Assignments and quizzes to be submitted have magenta (pink) icons.**

©2026

Assignments and file submissions

- If completing a course requires submitting an assignment, its availability window (from when and until when it can be uploaded) is shown beneath the assignment:

- Within this time window, click on the assignment and select the **Add submission** button.
- On the page that appears, **drag and drop** the file you wish to submit from your file manager or desktop into the file box. The instructor may restrict the **number, size, and type** (e.g., pdf, docx, or xlsx) of files that can be uploaded.
- Be sure to click the **Save changes** button, as this is when your work is actually uploaded. If you see green-highlighted text on the resulting page, you have submitted your assignment on time and successfully.
- Instructors generally allow you to update submitted work until the deadline, so if you delete your submission, you can re-upload a revised version.
